

FOOD SECURITY CLUSTER

Food Security Cluster global Support Team

The Food Security Cluster (FSC) has a global support team (gst) based in Rome that supports 35 active Clusters/Sectors globally. The aim is to monitor, coordinate, support remotely with surge and field missions the global deployed staff.

What do we do?

Co-lead by WFP and FAO, the Unit is part of the Emergency divisions, respectively EME and PSE. The Unit provides timely decision making by managing quality food security data and information. The FSC provides the guidance at country level that supports timely response. The FSC works with national cluster systems in both sudden onset disasters, be they from natural or human causes, and protracted crises.
